

Tenhave Leaf Scavenger Hunt

See how many of these leaves you can find in the woods.

Beech: Coarse teeth with straight veins

Elm: Lopsided leaf base and fine teeth

Sassafras: Looks like a mitten. Some leaves have two thumbs and some have none.

Cottonwood: A narrow tip and long flat stem

White oak group: Rounded leaf tips

Red Oak Group: Leaf tips look like little pins

Look for the shape of the leaf. The color is not important.
